Unit Testing In Angular

What is Jasmine?

- Jasmine is an open source testing framework for java script
- Jasmine is a Behavior Driven Development testing framework
- It does not require any other JavaScript framework
- Jasmine has easy to read syntax , Making it easy to understand
- Jasmine supports asynchronous testing

Unit Testing In Angular

What is Karma?

- Karma is an open source test runner for Java Script created by Angular Team
- Karma can be easily integrated into our project and makes it easy to execute test using angular CLI
- Karma is useful for executing the test on browsers , other devices like phone, tablets
- Karma can be configured with different test frameworks including Jasmine , Mocha ,QUnit
- Karma can be configured with continuous integration tools like Jenkins , Travis or Semaphore
